

**Parents/Guardians: Monitor Your Child's Symptoms**  
*In accordance with the Department of Health*

**Common Symptoms are Fever and Cough**

**Emergency Warning Signs Include:**

- Trouble breathing
- Pain or pressure in the chest that doesn't go away
- Experience confusion or trouble waking up
- Bluish lips or face

**Parents / Guardians should seek immediate care if a child has:**

- Prolonged fever (more than five days)
- Difficulty feeding (infants) or is too sick to drink fluids
- Severe abdominal pain, diarrhea or vomiting
- Change in skin color - becoming pale, patchy and/or blue
- Trouble breathing or is breathing very quickly
- Racing heart or chest pain
- Decreased amount of frequency in urine
- Lethargy, irritability or confusion
